Klotski
Klotski
GNOME Klotski is a set of block sliding puzzles. The objective is to move
bordered by green markers. To do so, you will need to slide other blocks
in as few moves as possible!

Work done till now

- Tests for the selection of an item in the sidebar menu.
- Tests for the selection of the particular log listing for the respective selected item by creating a mock GLJournal API and writing a fake message.
- Tests for the “Go back” functionality when the log listing is selected.
